

Biosimilars: A Safe & Effective Option for Patients

In the U.S., the FDA is approving more biosimilars and patients are benefitting from these new medicines. Access to these safe, effective treatments offers patients improved health outcomes. For more information, visit www.biosimilarscouncil.org.

A biosimilar is a biologic medicine that is

HIGHLY SIMILAR

to a brand biologic medicine.

More than **20 BIOSIMILARS** have now been approved by the U.S. Food and Drug Administration (FDA). Biosimilars have the potential to increase patient access to lower-cost treatment and reduce the price of brand-name biologics.

Same safety and efficacy as their biologic counterpart

Same mechanism of action

Rigorous FDA testing and review; lower cost to patients and the health system

Companies that manufacture biosimilars are committed to providing safe, effective products

Biosimilars are: Safe, effective, more affordable and offer improved patient access.

To learn more about barriers to patient access, view our white paper series Failure to Launch: [Part 1](#) and [Part 2](#).
